DETAILED ACTION

1. According to a preliminary amendment (paper no. 3) filed on Sep. 4, 2001, the applicants have amended claims 4-6 and furthermore, have added new claims 19 and 20.
2. Claims 1-20 are now pending in the application.

Specification

3. This application does not contain an abstract of the disclosure as required by 37 CFR 1.72(b).
An abstract on a separate sheet is required.

Claim Rejections - 35 USC § 112

4. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

5. Claims 1-20 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In claims 1-20, the term --vascular damaging agent ---- is vague. The applicants are suggested to delete this term.

In claims 1-20, the term ---substituted cis-stilbene moiety ---- for variable A is indefinite since the substituents are not defined.

Art Unit: 1625

In claims 1-20, the terms ----atom or group for variable X---- as well as -----inhibitor of the formation or action of nitric oxide or inhibitor of nitric oxide synthase for variable B are indefinite since these terms are not defined and furthermore, their point of attachment to rest of molecule are not defined.

In claims 15-18, the term --characterized --- is vague. The applicants are suggested to use the term ---wherein----.

In claims 17 and 18, it is not clear what is being treated or administered? Is it a mammal , human or an animal? Also, the term --diseases involving neovascularisation --- is indefinite. The applicants are suggested to include specific diseases.

Claims 15 and 16 provide for the use of a substituted stilbene compound, but, since the claim does not set forth any steps involved in the method/process, it is unclear what method/process applicant is intending to encompass. A claim is indefinite where it merely recites a use without any active, positive steps delimiting how this use is actually practiced.

Claim Rejections - 35 USC § 101

6. 35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

Art Unit: 1625

7. Claims 15 and 16 are rejected under 35 U.S.C. 101 because the claimed recitation of a use, without setting forth any steps involved in the process, results in an improper definition of a process, i.e., results in a claim which is not a proper process claim under 35 U.S.C. 101. See for example *Ex parte Dunki*, 153 USPQ 678 (Bd.App. 1967) and *Clinical Products, Ltd. v. Brenner*, 255 F. Supp. 131, 149 USPQ 475 (D.D.C. 1966).

Allowable Subject Matter

8. The following is a statement of reasons for the indication of allowable subject matter:

The instant compounds of formulae I and IA, pharmaceutical compositions containing them and a method of using these compounds are allowable over the prior art since they are neither disclosed nor obvious over the prior art. In the prior art, cis-stilbene and Combretastatin analogues (see EP 641767, WO 92/16486, J. Med. Chem. Bioorg. Med. Chem. Lett. , cited on applicants form 1449) are disclosed for treating solid tumors which are closely related to the instant compounds. However, the compounds of these references differ from the instant compounds in lacking inhibitor of nitric oxide attached to the cis-stilbene moiety and furthermore, there is no teaching, suggestion or motivation in the prior art to modify the prior art cis-stilbene derivatives to prepare the instant compounds.
